CAO LUONG THIEN

Thu Duc City, Ho Chi Minh City, Vietnam | (+84) 388 145 796 | thiencao.work@gmail.com | github.com/hiimthien | Portfolio

SUMMARY

Junior PHP Developer with 1 year of experience building e-commerce systems with third-party integrations (11 fulfillment providers, TikTok Shop) using CodeIgniter 4, Redis and MySQL. Strong in asynchronous processing, secure webhook handling and query optimization. Self-taught Laravel through two personal projects covering concurrency control, payments and real-time features. Seeking a Backend PHP / Laravel role.

EDUCATION

Nha Trang University **Sep 2019 – Sep 2022**
Associate Degree in Information Technology, GPA: 3.4 / 4.0

EXPERIENCE

TTR Group, Ho Chi Minh City, Vietnam **Sep 2025 – Present**
Junior PHP / Full-Stack Developer | Project: E-commerce Management Platform

- Integrated 11 print-on-demand fulfillment providers using Strategy and Factory patterns, normalizing different third-party APIs behind one interface; adding a provider only requires a new adapter class. Automated order routing and shipment tracking sync.
- Moved heavy tasks (catalog mapping, variant sync, batch price updates) to Redis queue workers with automatic retry on failed payloads, keeping the UI responsive and avoiding request timeouts.
- Built TikTok Shop webhook pipelines with HMAC signature validation, event routing (order, product, return/refund) and deduplication to prevent duplicate processing on redelivered events.
- Removed N+1 queries, added composite indexes on high-traffic tables and introduced Redis caching to reduce database load.
- Delivered the Return/Refund Ticket module end to end: multi-status approval workflow in CodeIgniter 4 and a reactive management UI in Vue 3 (Pinia).
- Integrated AI content and image services with MinIO object storage, implementing MIME validation, thumbnail generation, WEBP conversion and memory cleanup.
- Integrated Telegram Bot API for real-time order and system alerts, using isolated error handling so external API failures do not affect core transaction flows.

Mandatory Military Service **Feb 2023 – Jan 2025**

TMA Solutions (TMA Foundation Training), Quy Nhon City, Vietnam **Nov 2022 – Dec 2022**
Software Engineering Trainee | Company training and probation program

- Built RESTful backend services and learned core web application patterns.
- Worked in an Agile/Scrum team using Git workflows and code reviews.

PROJECTS (self-taught Laravel)

CineReserve — Real-time Cinema Ticket Booking System **github.com/hiimthien/cinereserve**
Stack: PHP 8.3, Laravel 11, Vue 3 (TypeScript), Redis, Laravel Reverb, MySQL 8.0, Docker Compose

- Prevented double-booking under concurrent seat reservations by combining Redis distributed locks (SET NX EX) with MySQL pessimistic locking (SELECT FOR UPDATE) inside transactions.
- Broadcast live seat availability to all clients with Laravel Reverb (WebSockets) and a reactive seat map built in Vue 3 + Pinia.
- Implemented idempotent payment webhooks, QR-based ticket check-in and automatic reservation expiration.

TechShop — Full-Stack Retail Tech E-Commerce & CMS **github.com/hiimthien/TechShop**
Stack: PHP 8.3, Laravel 11 (Sanctum, Reverb, Socialite), MySQL, Vue 3, TypeScript, Pinia, Tailwind CSS v4, Vite

- Structured the backend with a Service-Repository pattern, thin REST controllers, Form Request validation and unified JSON Resources.
- Built the checkout pipeline with atomic inventory decrement (anti-overselling), coupon calculation and a secure VNPay IPN handler (SHA512 checksum).
- Added Google OAuth 2.0 login, real-time events via Laravel Reverb/Echo, an admin analytics dashboard and automated tests with PHPUnit and Vitest.

SKILLS & ADDITIONAL

Programming Languages: PHP, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Backend: CodeIgniter 4 (production), Laravel (personal projects), RESTful APIs, Webhook Processing, Redis Queues
Frontend: Vue.js 3 (Composition API), Pinia, Vue Router, Tailwind CSS, Bootstrap
Databases & Caching: MySQL (Query Optimization, Composite Indexing, Transactions), Redis (Caching, Queue, Distributed Locks)
Integrations & Tools: TikTok Shop API, VNPay, Google OAuth, Telegram Bot API, MinIO, PHPUnit, Vitest, Git, Docker, Postman, Vite
